av.=Mean
dev.=Std. Dev.
ab.=Abstention

1. INSTRUCTOR EVALUATIONS

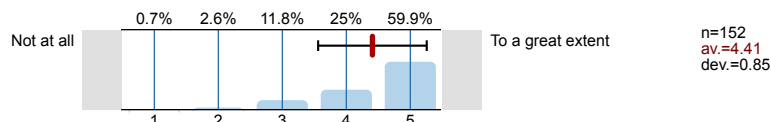

1.1) Rate the instructor's overall teaching effectiveness.

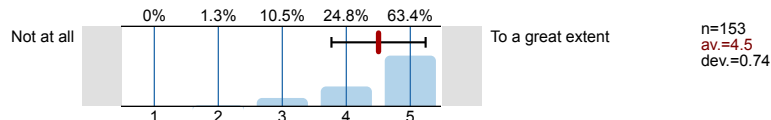

1.2) Rate the overall quality of the course.

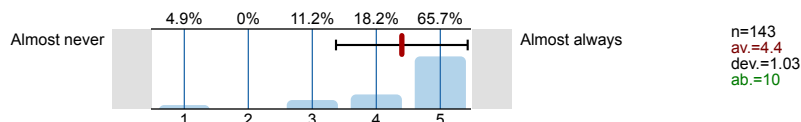

1.3) How well did the course assignments/quizzes/examinations reflect the content and emphasis of the course?

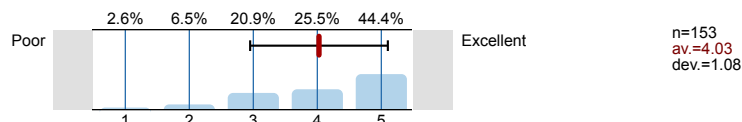

1.4) Was the instructor's use of technology (e.g., email, Blackboard, Powerpoint, other electronic and/or web-based methods) effective?

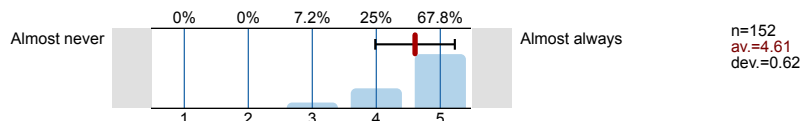

1.5) The instructor was sensitive to the cultural/human diversity, diverse worldviews, learning disability, and/or physical disability of the students.

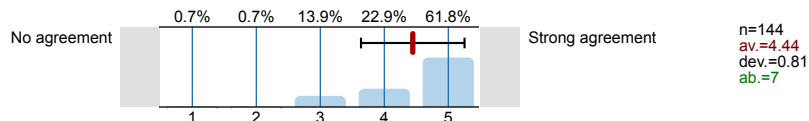

1.6) How would you rate the physical environment in which you take this class, especially the classroom facilities, including your ability to see, hear, concentrate, and participate?

1.7) Methods of evaluating student's work were fair and appropriate

1.8) The instructor demonstrated an understanding of issues related to cultural/human diversity.

1.9) You found the course intellectually challenging and stimulating.		n=150 av.=4.17 dev.=0.99 ab.=2
1.10) You have learned something which you consider valuable.		n=149 av.=4.28 dev.=0.88
1.11) Your interest in the subject has increased as a result of this course.		n=151 av.=3.85 dev.=1.19
1.12) You have learned and understood the subject materials in this course.		n=152 av.=4.09 dev.=1.01
1.13) Instructor was enthusiastic about conducting the course.		n=151 av.=4.28 dev.=0.85 ab.=1
1.14) Instructor's style of presentation held your interest during the class.		n=152 av.=3.97 dev.=1.19
1.15) Instructor's explanations were clear.		n=152 av.=4.28 dev.=0.93
1.16) Course materials were well prepared.		n=152 av.=4.52 dev.=0.71
1.17) The course adequately followed stated course objectives (i.e., course syllabus)		n=151 av.=4.56 dev.=0.65
1.18) Instructor gave lectures that facilitated note taking.		n=149 av.=4.35 dev.=0.87 ab.=2
1.19) Students were invited to share their ideas and knowledge.		n=148 av.=4.28 dev.=0.87 ab.=3
1.20) Students were encouraged to ask questions and were given meaningful answers.		n=150 av.=4.31 dev.=0.94 ab.=1

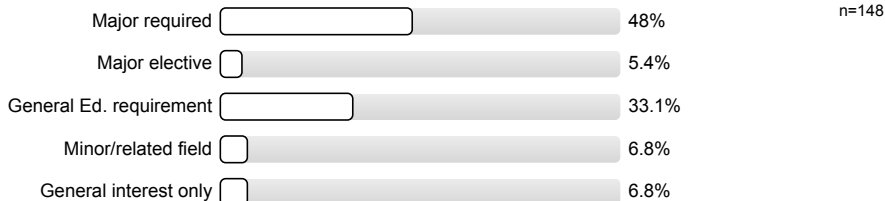

1.21) Students were encouraged to question/challenge the course material.		Poor	Excellent	n=150 av.=4.23 dev.=1 ab.=2
1.22) Instructor made students feel welcome in seeking help/advise in or outside of class.		Poor	Excellent	n=149 av.=4.36 dev.=0.86 ab.=2
1.23) Instructor had a genuine interest in individual students.		Poor	Excellent	n=144 av.=4.12 dev.=1.08 ab.=8
1.24) Instructor presented background of ideas/concepts covered in class.		Poor	Excellent	n=149 av.=4.42 dev.=0.9 ab.=1
1.25) Instructor presented points of view other than his/her own when appropriate.		Poor	Excellent	n=148 av.=4.34 dev.=0.85 ab.=4
1.26) Instructor adequately discussed current developments in the field.		Poor	Excellent	n=149 av.=4.36 dev.=0.86 ab.=3
1.27) Feedback on examinations/graded material was valuable.		Poor	Excellent	n=147 av.=4.07 dev.=1.06 ab.=5
1.28) Examinations/graded materials were returned on a timely basis.		Poor	Excellent	n=152 av.=4.46 dev.=0.8
1.29) Readings, homework, etc. contributed to appreciation and understanding of subject.		Poor	Excellent	n=148 av.=4.41 dev.=0.82 ab.=1
1.30) Course difficulty, relative to other courses was...		Very easy	Very hard	n=150 av.=3.33 dev.=1.05 ab.=1
1.31) Course workload, relative to other courses was...		Very easy	Very hard	n=150 av.=3.15 dev.=1.08 ab.=1
1.32) Course pace was...		Very easy	Very hard	n=151 av.=3.11 dev.=1.01 ab.=1

2. STUDENT CHARACTERISTICS

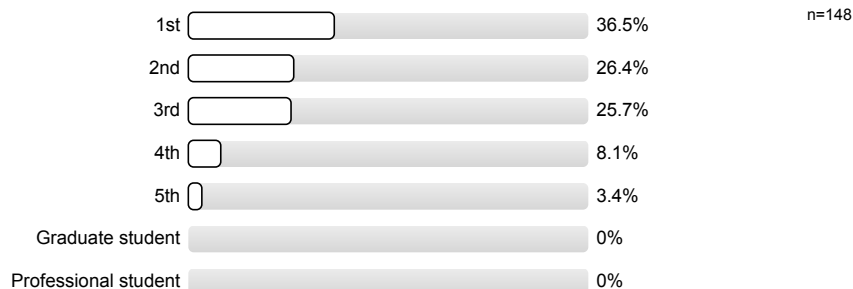

2.1) Overall GPA at UIC

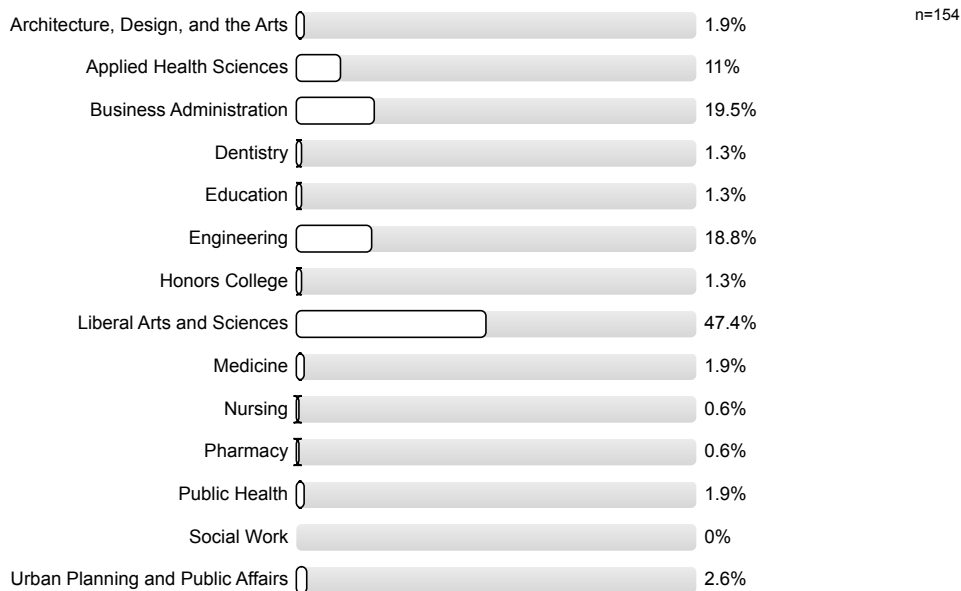

2.2) Primary Reason for taking the course

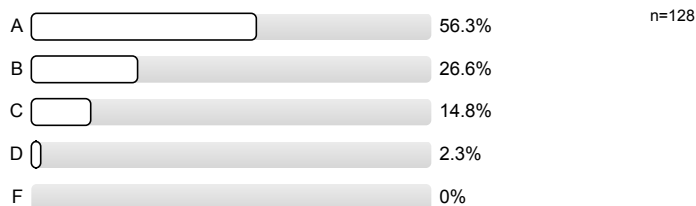

2.3) Year in school

2.4) Major College

2.5) Expected Grade in this Course

3. OPEN ENDED QUESTIONS (INSTRUCTOR)

3.1) Please comment on specific characteristics of the course that were most beneficial to you:

- - Having access to class recording
- - Access to slides before class
- After I had a career goal this class made me step out of my comfort zone and then at first, I thought it difficult, and then I felt a little bit confident to do well in some aspect of this class.
- Drops Lowest HW.
- Gave many examples and went through steps very thoroughly
- Going over homework related questions
- Good explanations of coursework
- Graphs
- Having the powerpoint prior to lecture helped a lot with note-taking (iClickers helps a lot too)
- He was concise with the informat
- He would send out notes before exams
- Helpful, great teacher
- I appreciate that the instructor was eager to help anybody who was confused when it came to the iclicker questions. He made it clear that it wasn't about getting the right answer, it was about helping to see if you understand the concept. Another thing that was appreciated was that the instructor would post his notes for the slides at the end of the week which helped a lot with understanding the concepts better. Overall, it was very clear that the instructor's goal was to help you understand the concepts of the class and it wasn't just about doing assignments for the purpose of giving a grade.
- I appreciated my professor and his teaching style, as well as his consideration and commitment to his student's success. Professor Yadav cares about his students and goes the extra mile to ensure that students understand the course material, and are set up to succeed.
- I appreciated the understanding of student needs
- I appreciated the way the instructor made sure if any students needed help they were welcome to ask. He made us feel comfortable enough to ask questions to get a better understanding.
- I believe the slides were the most helpful. The book does go in depth on the courses, and the slides cleared up any confusion presented it. Overall, Professor Yadav went above and beyond to support all of his students. He was very interactive during the lecture and ensured everyone was understanding the material.
- I enjoyed how he would go through difficult questions and took time to explain the reason for the answer rather than just providing the simple answer. Patient with students questions and prioritized students needs. Professor was understanding of life outside of classroom and gave multiple opportunities to raise overall grade in class.
- I feel like the instructor really explained well every topic of the course, he gave a bunch of examples in each topic and a bunch of problems and explanations in how to do the problems.
- I felt that what helped was recording the lectures just in case I couldn't attend class, posting the slide shows on blackboard also helped to follow along.
- I felt the workload was well balanced and the instructor gave great lectures, especially for a class this size.
- I found the recorded classes to be helpful because if I missed anything I could always go back and find it in the videos

- I like how he took notes on the slide and how he would explain every single material clearly.
- I liked the way the professor made notes on the slides he used so it was easier to understand
- I really enjoyed the content and the instructor. The content was not too difficult and the pace was good.
- I really enjoyed the way the profesor taught and the homework he chose to use. The End of chapter questions pertained pretty well to the info we learned in class and was a worthwhile homework to complete.
- I really enjoyed this course and I think the professor was very fair to all students. If I had to I would definitely take it again. Doesn't bot give too much work which helped me feel not to overwhelmed.
- I really like that the achieve program is set up to give you an unlimited amount of attempts and gives you feedback when you submit a wrong answer. That definitely helps me understand better what I am doing wrong.
- I think that the professor was really great - his style of lecturing promoted really clear explanations, great examples which made the concepts easier to understand.
- I think the lecture slides were decent, sometimes there were slides that had content on it but no context which was not helpful, also maybe adding the answers to the questions in the slides at the end would help. Also having the iclicker as participation without accuracy was helpful, because I struggled with the questions.
- I thoroughly enjoyed this class. I was expecting econ to be very boring but Chirag made it fun and enjoyable by adding very recent content as well as jokes and examples we would understand. He incorporated several iclickers into every lecture that were easily manageable and not ridiculously difficult. I think his quizzes and exams are proof that there is no need to make things unreasonably difficult, but you can still require your students to think.
- I thought the course was great when it came to the exams, prettty easy exams.
- I would say most beneficial was the explanations given in class.
- I would say the most beneficial part of this course where probably the recorded lectures and the achieve would sort of help but usually the study guides would help me the most on test, great teacher.
- Instructor always tried to give us visual with clear explanation of the different content presented in the class.
- Learning simply calculation on rate.
- Lots of explaining by the instructor
- N/a
- No
- None
- Not too much work and simply put information. This is expected in a intro class but it's great. Not a lot of fluff is good.
- Offers plenty of opportunities to improve your grade in the class. Many iClicker questions so doing the course work is most important but attendance and participation in class still plays some role.
- One of the best ECON 120 professors at the school. Unlike a lot of professors, puts emphasis on talking about problems in person instead of back-and-forth, unclear emails. Cares about the student's well-being, always is able to clarify a student's confusions with the material
- One specific characteristic I found most beneficial was homework overview. It helped understand certain assignments better and future ones as well.
- Professor Chirav is very considerate of all students and truly helps everyone to succeed in the course. This is very helpful, especially in my first year since I am just adapting to the new expectations and such.
- Professor Yadav made this course structures around the principles of economics but also brought in real life examples that reflected these principles which made them so much easier to understand.
- Professor Yadav was amazing at explaining concepts in lecture. I think that all of his explanations were very clear and he broke down the topics. I liked going through problems together to see how the math is done and then solving a problem on our own after. Overall the explanations during lecture were truly great and I learned a lot about a subject I knew nothing about.
- Professor being reasonable with deadlines and assignments. Providing extra help as well.
- Professor gave clear explanations and would always answer any questions needed.
- Professor made the overall course interesting with examples that the current generation would understand.

- Provided clear understanding of topics by connecting it to well known examples to clarify and visualize points.
- Recapping the important concepts. Asking us questions through iclicker and directly what we think. Checking in to see if we are following. Connecting concepts to current situations.
- Slowing down just a bit on the lectures would've been great, but the instructor made sure to over explain with difficult sections which was super helpful. The study guides were also super helpful.
- Some specific characteristics that were most beneficial to me was learning how the market worked and what are smart economic decisions looked like.
- Specific characteristics that were helpful was that the teacher had lecture slides that were well prepared. The teacher also provided much examples and went through hard homework problems in class that helped my understanding of the content.
- Teaching with background knowledge and giving examples to understand concept better
- The blackboard tools such as the lecture notes and the test practices.
- The class was pretty easy.
- The course helped me learn more about my major
- The course homeworks and slides were very informative
- The course material went over the fundamental ideas in the field of microeconomics and was generally easy to follow.
- The discussion lectures were super helpful
- The exam reviews really helped with all the exams taken.
- The exams are easy and the teacher explains very well.
- The extra credit opportunities
- The homework
- The homework assignments were really helpful as well as the study guides.
- The homework because it helps with studying for exams.
- The homework questions were good
- The homework was very useful and it helped being able to go back into the course and be able to review for exams. Also there were good amounts of extra credit opportunities.
- The iclicker and doing practice problems in between the lecture
- The instructor was very thoughtful and great at explaining things to the class.
- The lectures by professor Yadav
- The notes before the examination were very helpful which were very precise and covered all the points
- The professor was very approachable.
- The professor was very supportive and understanding. If needed he used to give extra credit assignments.
- The professor would not rush the lectures. He would repeat or teach in a different manner if students were not understanding the material.
- The professor's explanations, when you pay attention, were adequate and made sense. They helped a lot and pertained to the quizzes and tests pretty well.
- The random quizzes for extra credit. Made me pay attention more.
- The specific characteristics that were beneficial to me was how the discussion was based upon the homework because it gives us a rough idea how to approach the problem set.
- The teaching in the class was very great and the instructor was very cooperative and understanding.
- The ungraded homework assignments were helpful because they allowed me to practice the topics that I was not strong at without fear of a grade penalty.
- The very clear and cut presentation of each topic, the great real-life examples, and Prof. Yadav's responsiveness to students and

encouragement to learn stood out.

- There's not much to say.
- When the teacher would help students and me with questions we had.
- discussion sections, homework, lectures
- i think the instructor was kind and empathetic, he was very chill and very understanding to students, he would give amazing support and understood that the students also had a life, workload was not as heavy as i expected, i enjoyed his class, he is funny as well which made the class a bit more of a comfortable environment
- I liked that the homework was considered harder than the tests taken since it made the tests really easy to finish and get a good grade on.
- lectures and homework
- n/a
- problem solving
- the assignments, well thought out lectures, and the study guides for the exams
- the online questions honestly helped me the most.
- the slower speed that the course took
- the subject

3.2) Please comment on specific aspects of the course that need improvement:

- - Having more examples for certain parts of the lecture
- Accessibility of the course, if there was an online option provided to students in addition to in person lectures, that would be optimal for students.
- Better teaching style than just reading from the slides
- Can't think of any.
- Discussion class did not feel beneficial, I felt like I would go for attendance mainly.
- Discussion section can be a little more interactive.
- Discussion sections
- Easier homeworks.
- Either a bigger classroom or smaller class sizes are needed in this course's case. There were many people sitting on the ground during lectures. I also feel that something needs to be done about the larger projector screen in the lecture hall, as it can be hard to see with how bright it is in there.
- Go over easier to understand examples as a class
- Him talking more with the students
- I don't know if the lecture recordings were always on blackboard or a different place, but a place where the lectures recordings are stored early in the semester would have been great.
- I don't really think we need any discussion sections. The only time they were useful was doing review for exams, but just sitting there for 50 minutes while going over the content for a second time wasn't useful since the professor already did an excellent job at explaining content during lecture.
- I don't think this course needs improvement, I did need more help on some topics like midpoint Equation it should've probably been written out in a way a beginner can remember it
- I found the class to have no flaw besides that of not being able to help every individual student while in class.
- I think a few questions within the End of chapter questions are a little too difficult and do not pertain to the information we learned during the week so they were just a little hard to complete.
- I think it does not need improvement. it is perfect the way it is.

- I think it's pretty perfect but maybe weekly quizzes would help some with perspective.
- I think one place that could use improvement is maybe explaining the graphs a little bit more in class. I found myself struggling to understand some of them and I think the teacher didn't clarify the explanation of the graphs as much. I think also posting the answers/ explanation to the iclicker questions after class would help as I wanted to go back to some of them.
- I think possible improvements could be new methods of keeping people engaged maybe more hands on things to do during class
- I think that there needs to be more examples on how to solve some of these problems. I also think that the microphone needs to be fixed in that lecture hall.
- I think the course is perfectly fine. No need for improvement
- I think the discussion sections could be more productive, differently structured discussions could help. I didn't find the discussion sections very helpful overall.
- I think the only thing I found difficult was grasping the concept in a timely manner. so if there could be more examples with step-by-step explanations, I think that would be beneficial.
- I think the professor needs to simplify their explanations, because I feel that sometimes it would be a simple concept but their explanation just made it very confusing.
I think having the professor upload the lecture notes after every class would be more beneficial than at the end of the chapter because it helps with homework and general understanding when taking notes. Also please get a TA that knows what they're doing and knows how to engage with the class because I feel like the discussion session should have helped me more, but because the TA didn't understand or didn't know how to explain the concepts either it just felt pointless.
- Improvement would probably be for there to be lecture videos in case a class is missed or was running late.
- In the beginning of the year there wasn't enough seats for everyone so people would have to sit on the ground.
- It wasn't easy to stay attentive in lectures.
- It would be best to lower the seat requirement for this course or provide a bigger lecture room. There were times in which some students did not have a seat and had to resort to sitting on the floor.
- It's hard to remember the equations needed to figure taxes, costs, etc. I think it would be nice to have a sheet with the formulas so we can look back on them on one page instead of scrolling through every lecture slide to find it.
- Lectures are just going over power points which does not help, otherwise the course went great
- Maybe just being or speaking a little bit clear but besides that everything is good.
- Maybe the inclusion of students to answer instead of just the questions on the IClicker.
- Mic translator
- More interactive work
- More participation
- More practice problems during class
- N/A (5 Counts)
- N/A.
- N/a
- No
- None (5 Counts)
- None at the moment. More participation in lecture maybe.
- Nothing needs improvement
- Nothing really
- Nothing really need improvement besides the fact that he may be going through slides a little quickly.
- Nothing specifically.
- Nothing.
