3. OPEN ENDED QUESTIONS (INSTRUCTOR)

3.1) Please comment on specific characteristics of the course that were most beneficial to you:

- Exam practices really helped me
- Extensive quizzing and PowerPoint presentations were very helpful for the learning.
- Help me understand the concept of how the economy works.
- I have studied more about statistics in microeconomics.
- I learned basic microeconomics knowledge. If I have a question, no matter how late it is, He will help fix or teach them again after class.
- I really liked the content of the class, it was challenging yet interesting. I liked the teaching of Chirag Yadav, he explained every concept clearly and in details
- I think this course is good to student for understanding social economic knowledge.
- One of the most beneficial aspects of this Econ A course was how clearly it explained core concepts like supply, demand, and market equilibrium. The practice exams and examples really helped me understand how to apply formulas and think through real-world scenarios. I also appreciated the step-by-step approach to complex topics, which made it easier to remember and use them in problem-solving.
- Since this is class required for my major, I believe that the class really gave me a great introduction.
- Studying economics has inspired me to consider pursuing a minor in Economics.
- The course clearly explained key concepts and connected them to real-world examples, which made the material easier to understand. The assignments and in-class activities also helped reinforce what we learned.
- The professor gave us a lot of opportunities to get good grades and helped us to solve questions in the correct way.
- The slides
- There were many factors in the course that were very helpful to my learning process. What I appreciated most was the way the professor organized the content in a clear and logical way, making it easy for me to follow the lecture progress and understand the connection between the topics. In addition, the learning materials provided, including slides, illustrative examples and additional readings, were very useful, contributing to consolidating my knowledge and helping me to better grasp the lesson content. I also appreciated the interaction in class. The professor frequently asked questions, encouraged discussion, responded via iClicker to take attendance, while increasing understanding and creating an environment where students felt comfortable sharing their opinions. This helped me to be more proactive in learning and understanding the lesson more deeply. Overall, the course structure, quality materials and the professor's teaching methods were all factors that significantly benefited me.
- This course very helpful to understand basic notion of Economics. Also my major is business marketing so I think this class is very good starter for understand basic notion of marketing.
- Understanding the world on economics and how they think in problems.
- his support outside the class is very good, he also very helpful.

3.2) Please comment on specific aspects of the course that need improvement:

- -
- Although the course was well organized and the content was rich, there were still some points that could be improved to enhance the learning experience. First of all, the professor's lecture speed was sometimes a bit fast, making it difficult for me and some of my classmates to follow the main ideas or take notes in time. I think that adjusting the speed a bit, or taking time to pause to emphasize important points, would help us students absorb more effectively. Overall, just adjusting the speed and adding more time to reinforce the

content would make the course more accessible and effective.

- Everything is fine
- I honestly feel that there isn't much left to improve; it already looks very good.
- I think in the first week, the Professor can tell all the students that you will not give anyone an attendance point who didn't come to class, because I think a lot of students misunderstand that they can use iClicker to get points at home. Of course, this is the student's responsibility to come to class, but if professor said it a lot in the first week. I think students who don't come to class cannot argue with anything.
- I think that was going good.
- Maybe some kind of word I feel hard to hear when the instructor says
- Some topics could use clearer instructions or more examples. Additional review materials or practice problems would help students better prepare for quizzes and exams.
- Sometimes the instructor explains material that is not on the slides, which should be added to the slides.
- There is not really a flaw/problem that I experienced with the class.
- This course no need improvement.
- i guess nothing
- i would say about the way the teacher teaching..I have to be honest, i was trying to focus on the lecture also on the presentation, but barely understand 100% in each class. maybe the improvement here are the method that the professional need to change.
- professor talks kinda fast and hard to understand

3.3) If necessary, clarify any of your previous responses or make additional comments:
