Question text

n=No. of responses
av.=Mean
dev.=Std. Dev.
ab.=Abstention

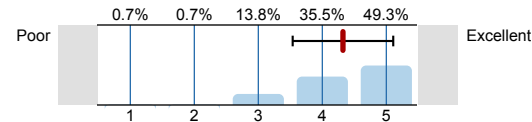

1. INSTRUCTOR EVALUATIONS

1.1) Rate the instructor's overall teaching effectiveness.

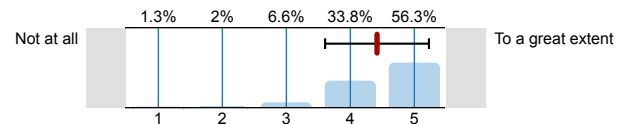

n=152
av.=4.34
dev.=0.78

1.2) Rate the overall quality of the course.

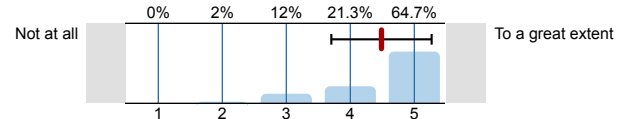

n=152
av.=4.32
dev.=0.79

1.3) How well did the course assignments/quizzes/examinations reflect the content and emphasis of the course?

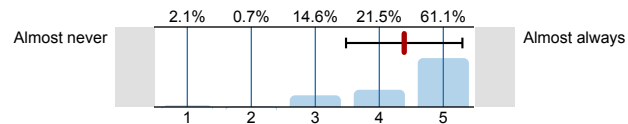

n=151
av.=4.42
dev.=0.81

1.4) Was the instructor's use of technology (e.g., email, Blackboard, Powerpoint, other electronic and/or web-based methods) effective?

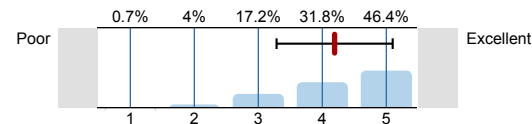

n=150
av.=4.49
dev.=0.78

1.5) The instructor was sensitive to the cultural/human diversity, diverse worldviews, learning disability, and/or physical disability of the students.

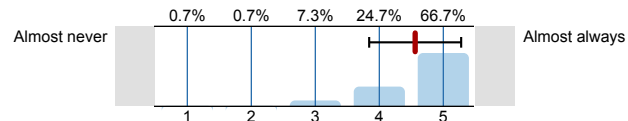

n=144
av.=4.39
dev.=0.91
ab.=8

1.6) How would you rate the physical environment in which you take this class, especially the classroom facilities, including your ability to see, hear, concentrate, and participate?

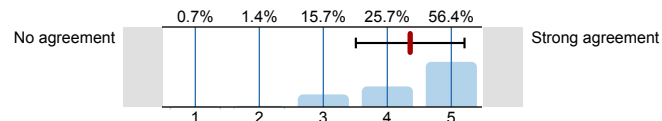

n=151
av.=4.19
dev.=0.91

1.7) Methods of evaluating student's work were fair and appropriate

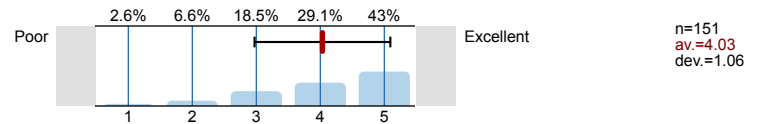

n=150
av.=4.56
dev.=0.72

1.8) The instructor demonstrated an understanding of issues related to cultural/human diversity.

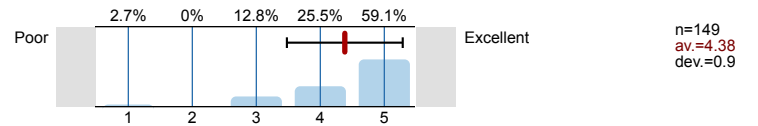

n=140
av.=4.36
dev.=0.85
ab.=7

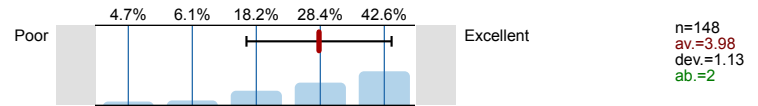

1.9) You found the course intellectually challenging and stimulating.

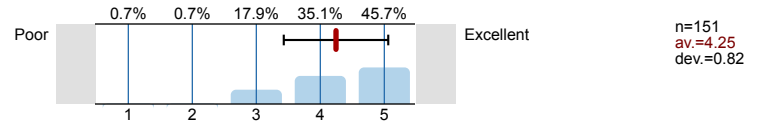

1.10) You have learned something which you consider valuable.

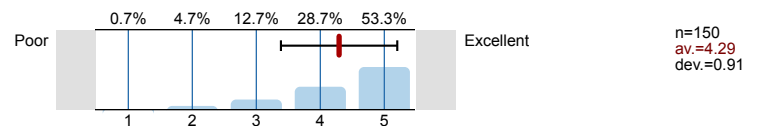

1.11) Your interest in the subject has increased as a result of this course.

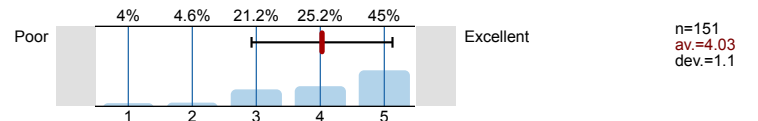

1.12) You have learned and understood the subject materials in this course.

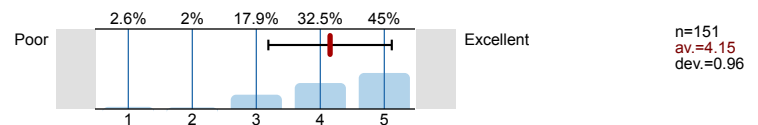

1.13) Instructor was enthusiastic about conducting the course.

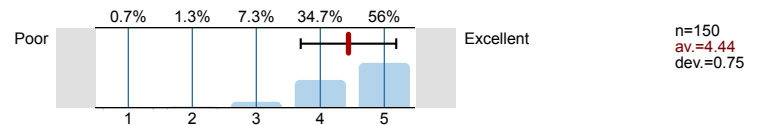

1.14) Instructor's style of presentation held your interest during the class.

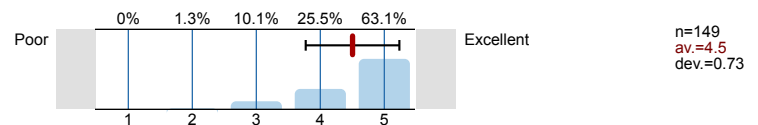

1.15) Instructor's explanations were clear.

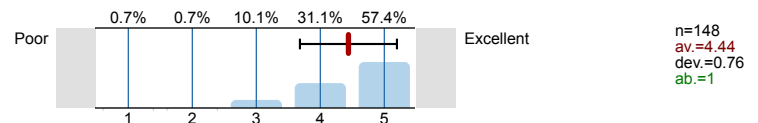

1.16) Course materials were well prepared.

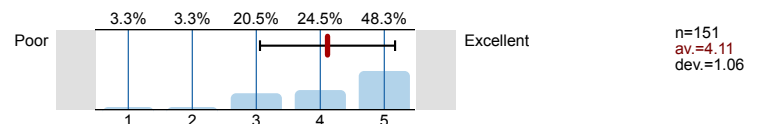

1.17) The course adequately followed stated course objectives (i.e., course syllabus)

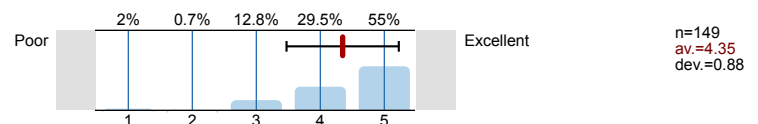

1.18) Instructor gave lectures that facilitated note taking.

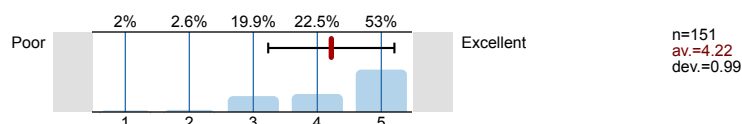

1.19) Students were invited to share their ideas and knowledge.

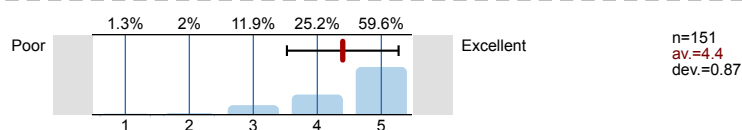

1.20) Students were encouraged to ask questions and were given meaningful answers.

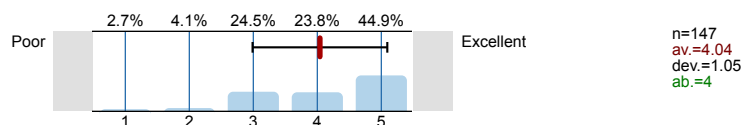

1.21) Students were encouraged to question/challenge the course material.

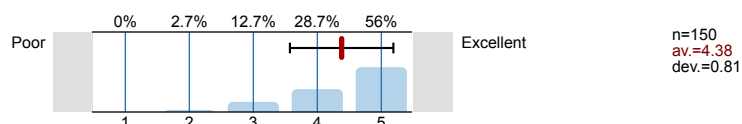

1.22) Instructor made students feel welcome in seeking help/advise in or outside of class.

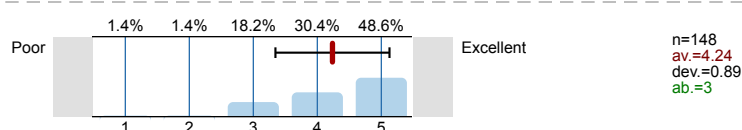

1.23) Instructor had a genuine interest in individual students.

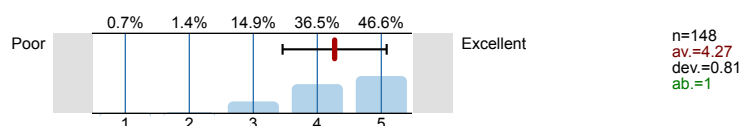

1.24) Instructor presented background of ideas/concepts covered in class.

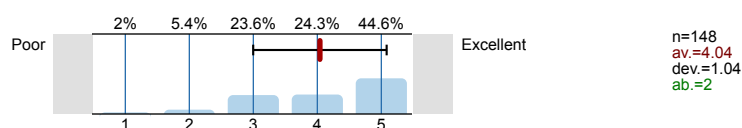

1.25) Instructor presented points of view other than his/her own when appropriate.

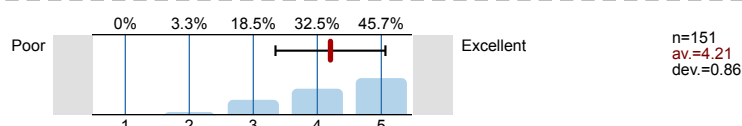

1.26) Instructor adequately discussed current developments in the field.

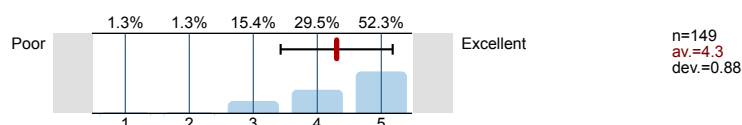

1.27) Feedback on examinations/graded material was valuable.

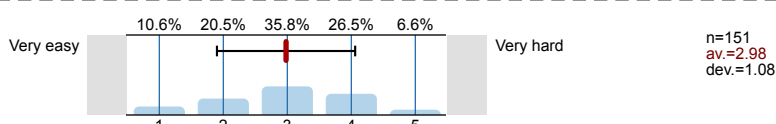

1.28) Examinations/graded materials were returned on a timely basis.

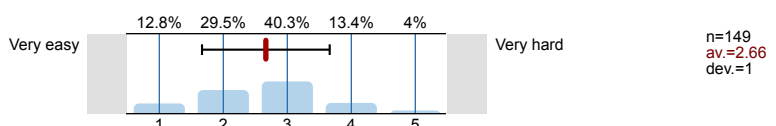

1.29) Readings, homework, etc. contributed to appreciation and understanding of subject.

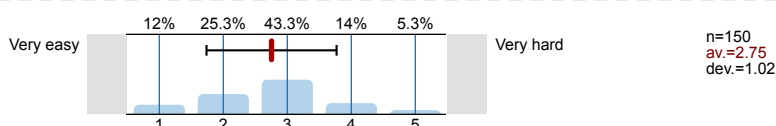

1.30) Course difficulty, relative to other courses was...

1.31) Course workload, relative to other courses was...

1.32) Course pace was...

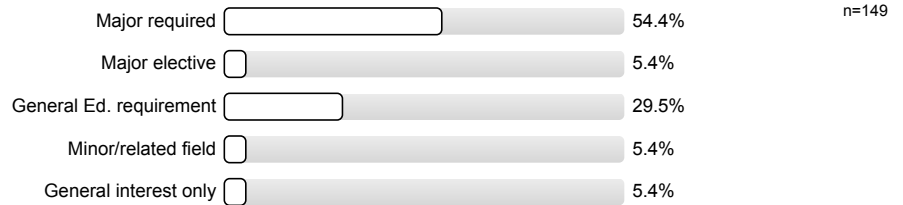

2. STUDENT CHARACTERISTICS

2.1) Overall GPA at UIC

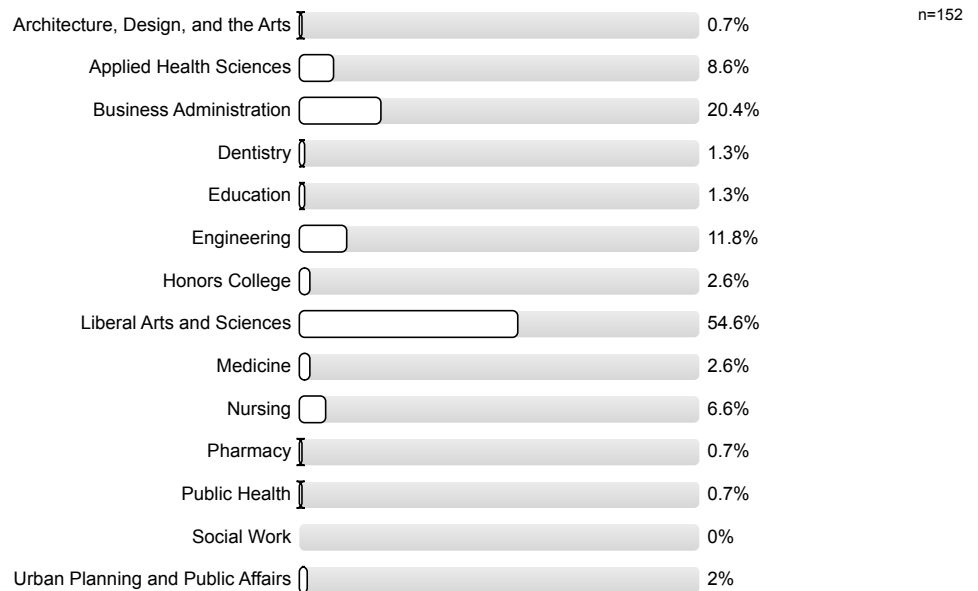

2.2) Primary Reason for taking the course

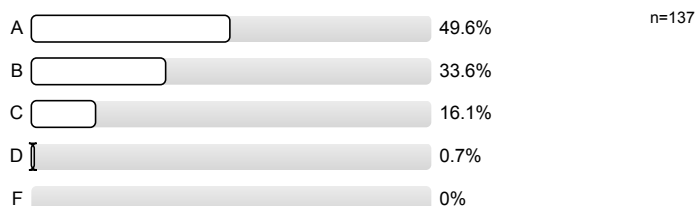

2.3) Year in school

2.4) Major College

2.5) Expected Grade in this Course

3. OPEN ENDED QUESTIONS
(INSTRUCTOR)

3.1) Please comment on specific characteristics of the course that were most beneficial to you:

- Being able to ask questions and answer questions in class, and having them be thoroughly explained back.
- Coming from a business family, it was good to learn so much about economy.
- Constant example problems.
- Course incorporated diverse teaching methods such as lectures, discussions, simulations, or multimedia resources can cater to different learning styles and maintain student interest.
- Everything was awesome, the instructor tried his best to make it easy for us to understand all the materials.
- Flexibility with attendance/having access to recorded lecture
- Formulas to calculate Market Cost, revenue, and etc.
- Great pace and a steady workload
- Great professor, was always keen on making sure everyone understands by encouraging questions and always finds a way to help us for upcoming exams.
- Having a discussion session in place was really beneficial as we were able to go over concepts as a smaller group and it provided extra help in order to complete the homework.
- Having discussion section quizzes were beneficial; they helped test my knowledge and determine what concepts I needed to study more. Examples and iClickers done in class were also beneficial to understanding concepts because the professor would break down the problem to help people understand.
- Having the iclicker because I get to see what other people answered and compare it to my answers.
- He teaches very good
- He went very in depth about things which made it much easier to learn. Sometimes though, if you miss lecture there is a lot of stuff that is discussed in class (written on slides) that you will miss out on if you have to miss a class.
- His tone
- Homework was given ahead of time and wasn't a lot but still covered the whole chapters very well. Went through extra credit or exam examples was super helpful and clickers to keep engaged
- Homework, Extra Credit, and Practice Exams were very useful.
- I don't think whatever we have been learning in class and the content we are being tested and doing homework is not all related at all.
- I enjoyed the I clicker questions they helped a lot and the extra credit was also really nice.
- I enjoyed the way Professor Chirag would explain the concepts and how he would take the time to ensure that the students understand the meaning behind the equations and way of thinking. He also included a lot of clicker questions which help understand the material being taught and gave great insight to how well the class knew the material and it decided if he needed to explain the topic a bit more before going to a new one. Overall, he was enthusiastic about teaching and his material was relevant to the exams.
- I generally enjoyed the topic and the characteristic of the use of graphs and tables was most beneficial to me.
- I have never had a professor that was more patient at UIC than him! He was always very eager to go over examples and made sure we felt comfortable to ask questions. He would literally repeat himself over and over if we needed him to! Very very nice man and needs a raise lol

- I like that whenever I had a question he would answer my question along with a good explanation and wanting to know my thought process. He also would answer my email pretty quickly which is not very common for professors.
- I like the thing is the instructor is nice and the class is not very difficult.
- I liked the professor added current real world examples to help students better understand the chapter(s)
I also liked how considerate and understanding he was toward his students
- I really appreciate how much the professor was open to answering questions and how fast his email responses were, that was extremely helpful, also how he was willing to answer questions and give explanations right before and right after lectures. I also appreciate the extra credit opportunities and how we were able to have recordings of lectures sometimes. And one thing that was extremely, extremely helpful was how much the professor would repeat certain information multiple times to make sure we understand. I personally sometimes take a minute to process information, especially new information, so him repeating certain things or further clarifying things that were already clarified was very helpful. The iClicker practice questions were very helpful ways to further understand the material.
- I really appreciated the clicker questions and explanations after them , they were very helpful.
- I really like the discussion, it's helpful but it still throws me off when comparing it to the class lecture slides.
- I really like the environment of the class and how he takes time to go over anything that students are confused on or need help with.
- I think that the i-clickers benefited me when trying to learn the material, especially since we get points for just trying but we earn an extra point for answering correctly. This didn't rush me to just click the right answer and made me want to actually take my time to learn the material.
- I think the homework given to us was very helpful to study for the exam and the study guide (notes) that the professor provided also helped to see what concepts we will be tested on and what we have to study.
- I thought the iClicker questions were helpful because they challenged your understanding while you were in class.
- I'm glad to receive attendance points for showing up. I also appreciate the extra credit opportunities because doing the work is a lot sometimes.
- It was very helpful to have the notes that the professor annotated in class posted to Blackboard, it made doing the homework and studying for exams easier. The homeworks had direct relations to the exams which was very beneficial to me as well. The professor was very accommodating to the students and would do anything he could to give us some extra credit. It was honestly refreshing seeing a professor who actually cares about the well-being of his students and it is no coincidence that everyone in class is also doing well because of it.
- Learning about how market of demand and supply works
- Lectures and discussion
- Lectures and discussions were really helpful when it comes to understanding materials that are harder. Professor and TA also emphasized the topics that are important to learn to help us be successful in this course
- Lots of practice questions and examples and homework helped.
- N/A (2 Counts)
- N/a
- Nice professor, likes to accommodate his students.
- Notes and reviews are very helpful and reflective of exams.
- Pace of class
- Professor Chirag is receptive to student feedback and even implemented suggestions mid-semester to accommodate students. When I needed help Professor Chirag easily made himself available and would even review concepts after class.
- Professor Chirag would stop during topics that the class was struggling with to teach more in depth on topics so the class could fully grasp the material.
- Professor Yadav puts great effort into his lectures and in teaching students. He is aware with social events culture and presents him in his lectures in order to facilitate student's understanding. Some may say that he takes too long on teaching one subject but I think it works well because it is reiterated and explained several times until you fully understand it. He is fair, trusting, and wants to see his students do well in the course. It is very helpful that he gives a lot of room for improvement in the course with multiple activities for extra credit to incentivize students. It is very appreciated!
- Slides being on blackboard
- Solving problems together
- Something that was most beneficial to me was the amount of extra credit opportunities available. Another, questions/emails were

answered on a timely basis.

- The Iclicker was most beneficial to me.
- The best professor I had my whole two years I been at UIC. He explains the concept so well and the slides and the homework actually help when it comes to taking the exams not like other departments. I wish every professor was like this.
- The class being recorded so you can go back to get better understanding of topics covered in lecture was beneficial.
- The class was taught so well that it was very easy to follow along and understand what the professor was saying. It was not a difficult class whatsoever but I still learned a lot.
- The discussion section powerpoint slides and the lecture slides were helpful in learning and understanding the information.
- The discussion sessions with the TA's offered the best help outside of office hours.
- The fact that there were lots of extra credit opportunities in the class. Homework was straightforward. Allowed a notecard as formula sheet for exam. Wrote good handwriting on his tablet.
- The homework assignments.
- The homework was very helpful for the tests, if you did the homework, generally you will do well on tests.
- The homeworks, practice exams and going through both in class were very helpful to study. The professor's midterm notes before each exam were helpful. I liked the iclickers that related to real life examples of the topics.
- The iclicker questions and the slides
- The instructor gives practice questions in his lectures and uses words and expressions to help us understand the material.
- The instructor was great at explaining things and he was always very welcoming to students who needed extra help. I really enjoyed coming to his lectures. He also asked us for input on how to improve the class after the midterm point in the semester. He actually took our suggestions and that made me feel really seen and heard as a student. He's great!
- The lectures were well organized and material was helpful in being successful in the course.
- The most beneficial characteristic of the course are the iClickers because I got to challenge myself on the current material that was being covered in lecture. Through trial and error, I was learning the material in an engaging way,
- The most beneficial characteristics were going over homework questions during lecture, study guides for exams, and he would always clarify content if the class was confused.
- The notes slides that the instructor provided were extremely useful and made it easier to understand the content
- The overall concepts of microeconomics were good to learn.
- The power point and the real life examples was very beneficial.
- The practice exams and notes for exams helped greatly to prepare for exams.
- The practice exams were the most beneficial for me.
- The professor took time to break down the material and provided us with practice problems.
- The professor was very understanding and took time to explain anything that you are confused about. He gives a good work load and a lot of help options.
- The quizzes were helpful
- The slides
- The slides were really useful to look back when looking at a general overview of the chapter it discussed.
- The specific characteristics of the course that was most beneficial for me was the notes provided by the instructor and especially the ones provided by the course TA. It helped a lot while preparing for exams.
- The specific characteristics that were most beneficial to me were the iClicker questions and the explanation of them thereof. The helped me grasp the subject that was being taught at hand in regard to how to answer questions pertaining to homework, quizzes, and exams. I also liked that the professor took time to go over certain questions that were found to be difficult by the majority of the class. I appreciated the use of real-world examples that were relevant to current events which also aided in my understanding. Lastly, I found the exam reviews and our ability to use both a notecard and calculator for our exams extremely helpful.
- The visual component helped me understand more quickly

- The way the teacher taught was very well and thorough.
- The workload was efficient.
- This course provided me with many aspects about business, understanding decision making, and market structures.
- This professor would respond to my questions through email quickly and would give a thorough explanation. He understood any concerns/situations I was put in when it came to attendance and late work. He gave me enough time to complete assignments. His explanations during lectures are great and also records the lectures for any further purposes. Compared to other econ 120, especially based on the grades this professor's students receive, this professor is doing a great job.
- Using examples that related to the class made understanding the subject easier.
- Very interesting topics, the professor did a good job explaining concepts and was always ready to talk about individual problems both during and after class.
- discussion sections with the quiz were helpful
- lecture slides being available was very beneficial to me. I also appreciated all the study guides that were provided to us before every exam.
- n/a
- nice
- notes and iclicker.
- slides he present in class and the homework solutions
- that benefits me a lot, it helps me understand many fields in the economy that I can apply immediately on the homework and the real life.
- the slides
- the textbook was very cheap which was nice
- tutors and TA's going over the material multiple times.
- what I found helpful were the iclickers and study guides for exams.

3.2) Please comment on specific aspects of the course that need improvement:

- A consistent homework submission system, it can't be scanned and pdf for some, and online submissions for others. The lack of feedback on grading the homework or quizzes.
- According to me, I don't really think there needs to do any changes to any of the current aspects of the course.
- Although I like that our instructor grants us extra time to get to our next class on time, it can become difficult to concentrate in the last few minutes of class when everyone is packing up early.
- Consider diversifying resources to accommodate different learning preferences and backgrounds. Providing access to a range of materials, including textbooks, articles, and online resources.
- Control of the classroom
- Explain during lecture need to be more clear.
- Have more enthusiasm while teaching.
- Having less discussion question because we don't finish in time.
- Homework being the online submission instead of the pdf format submission.
- I believe the repetition of the same way of presenting everyday caused a loss of interest.
- I don't think any do
- I don't think this class needs improvement
- I feel like some of the homework questions were too confusing or too advanced for the course.
- I liked the flow of the course and the workload was manageable, but I would have preferred if the exams were more multiple choice.

- I think that the homework was unnecessarily difficult at times and did not need to be that long or confusing. I, so far, have gotten 100%'s on both of my midterms but I felt that the homework really did not have anything to do with the exams.
- I think the after taking the tests and getting the grades for it we should be able to have it to see what we got wrong and right. Also the previous test would help us study for the upcoming ones and it would be helpful if they returned it.
- I think the connect that is being tested n should be taught in class. The class barely follows the textbook. I think the instructors should either follow the textbook or their own content/ slides
- I think the quizzes need improvement since at times they did not reflect the current material.
- I think the quizzes were always a bit harder than the homeworks and the exams.I would make the questions more straight forward and not worth so much points.
- I think we can do more iClicker in this class.
- I understand that lecture recordings are removed from Blackboard for a reason, but having access to the lecture recordings more frequently could've been helpful to go back to when I had trouble comprehending and for studying too.
- I would say maybe making some examples a bit more real life related as during the homework part, me personally. I was overthinking as i thought the questions would mean some other things
- In class presentations were difficult to follow especially early in the morning providing note outlines or doing problems so the class can follow along would be more beneficial to make it easier to follow.
- In terms of exams, I wished they were given physically back to us with feedback
- It was sometimes a bit hard to understand the professor because he often did not talk loud enough for a class with more than 100 students
- It would be nice if there were more examples of how to solve the homework problems, or just more practice problems in general so that we could better prepare for exams
- Lectures could be more engaging aside from the text on a PowerPoint, and highlighting the most important aspects of the course should be what is seen in lectures, and the rest can remain on the PowerPoint but on its own.
- Make sure the TAs are on the same page and understand the concepts. Multiple times they were saying things that conflicted with the information presented by you at the lectures.
- Making it engaging enough to keep students till the last minute. Students tend to start packing and leaving ten minutes before class. This professor can use some enthusiasm and more energy instead of just lecturing. But his lectures include interesting examples and content.
- More help in really understanding the context.
- N/A (8 Counts)
- N/a
- NONE
- No comment
- No need for improvement
- None (2 Counts)
- None, I enjoyed this course a lot and felt it was well run.
- None. I think the class flow, workload, and instruction was helpful to me in all aspects.
- Note-taking felt difficult sometimes due to all the graphs, felt like I couldn't really take notes over them without being confused about what I was looking at when trying to study for exams.
- Nothing (3 Counts)
- Nothing overall he is a good professor that if you have questions just go to his office hours which he explains do you even more perfectly
- Nothing really. This class was great
- Nothing.
- One thing that I say would need improvement is the microphone, it gets hard to hear him during lecture as the microphone is quiet. Other than that, I thoroughly enjoyed this course.
